Yamaha Introduces New Multi-function Display

Yamaha continues to innovate in providing accurate and instant information about boat and outboard systems. In 2017, Yamaha brings the CL7 touchscreen display on board.

Yamaha's all-new display features a seven-inch touch panel with full multi-function display (MFD) capability and connectivity. It offers precise engine and boat systems data for up to four outboards on one screen, along with other MFD functions, such as maps, fish finder, and graphing capabilities through its built-in 10 MHz GPS unit.

It serves as the primary display for boats using Yamaha's Command Link Plus® system, which feature digital electronic controls (DEC).

Yamaha specified and designed software to facilitate the capabilities of its various systems and selected industry-leader Garmin® to provide the platform to meet these needs.

The display is offered in two models: one with detailed fresh and saltwater maps built-in, and the other with basic maps that are easy to upgrade. Both models include detailed fuel flow information and a host of operator-customized functions and appearances.

The CL7 can integrate with other Garmin® devices on their proprietary network, and additionally features a robust NMEA 2000® internal gateway, allowing displayed data to be output to approved MFD models and brands including Furuno®, Simrad® and Lowrance®.

Part numbers to be determined. Expected availability Summer 2017.

REMEMBER to always observe all applicable boating laws. Never drink and drive. Dress properly with CCG-approved personal floatation device and protective gear.
